

## Major Solution Provider for Supply Chain Logistics Oversight Relies on Connected IO

### When it Comes to Efficiency, Supply Chain Information Can't Wait

Sensor Station, part of the CargoSense supply chain management solution, automates sensor reconditioning and processing operations. Data is transmitted from the CargoSense Sensor Station to the CargoSense Portal, requiring ultrareliable Internet connectivity. [Additional content needed]

#### Solution

To ensure data is transmitted quickly and conveniently, CargoSense uses Connected IO ER1000 routers and EM1000 modems to provide wireless connectivity over cellular networks. [Additional content needed]

#### Advantages

Known for superior reliability and performance, Connected IO routers and modems...[Additional content needed]

**Connected IO EM1000**

CAT 3 4G LTE/3G Modem

Ultracompact, EM1000 features a high-speed multiband cellular modem encased in an innovative lightweight slimline enclosure.

**Connected IO ER1000**

CAT 3 4G LTE/3G/2G Router

Ideal for surface-mounted applications, the ER1000 features a high-speed wireless router and multiband cellular modem in a single, ruggedized metal enclosure.
