

Commercial Vehicle GPS Tracking and Video Streaming Service Rolls with Connected IO

Transmit from Commercial Vehicles Wirelessly

Rosco, maker of the Dual-Vision XC4 HD Recording Camera, needed a wireless solution that could accommodate variable voltages, temperature changes, and the high-vibration environment of commercial vehicles. [Additional content needed]

Solution

With its innovative, slimline, thermally conductive design, the Connected IO EM1000 4G LTE modem with 3G fallback provided the rugged and reliable performance the Rosco solution demands. [Additional content needed]

Advantages

“We selected CIO products and services to upload large video files on demand across North America. We find CIO products to be robust in the vehicle environment; able to handle temperature variations, variable voltages, and high-vibration environments.”

Gary Balsam

Director of Corporate Development, Rosco

Connected IO EM1000

CAT 3 4G LTE/3G Modem

Ultracompact, EM1000 features a high-speed multiband cellular modem encased in an innovative lightweight slimline enclosure.
